## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 63-70 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shin et al in view of Matshuhashi, Stolk and Matsuo (6,737,309). The explanation of the Shin, Matshuhashi, and Stolk references is hereby incorporated by reference from the previous actions. It is noted that new claim 63 does not specifically require that the central portion of the gate actually contact the gate dielectric layer, nor does it specify that there is an opening or gap between the extension regions of the outer portions of the gate electrode. As such, the extension regions may contact each other at the bottom of the trench and form essentially a continuous bottom layer. As shown by Matsuo in FIG. 11, central gate portion (117) overlies the "extension" portions of outer gate (114) and also abuts the sidewall portions of outer gate (114).

Taken together, these references would meet all of the features of claims 63-70, and one skilled in the art would be motivated to combine these references in order to tailor the threshold characteristics of the device.

### *Allowable Subject Matter*

Claims 35-62 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2815

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
